## Professional Experience:

**Company:** Luminescent Digital  
**Technology:** Angular, NgRx, Angular Material

- Working as a UI developer on the product for the automobile domain.
- Creating the client side of the app using Angular, Typescript and Angular material.
- Using NgRx for the client-side state management and implemented NgRx concepts such as store and effects.

**Company:** ADP  
**Technology:** Angular, NgRx, ASP .NET, Web API, C#

- Worked as a full-stack developer on the product for the HR Management domain.
- We were working on a time and labour management software (TLMI) which is used by our clients to process the payroll for their employees.
- The UI is developed using Angular and the Web APIs are built using ASP.NET. We are using Oracle as our primary database.

**Company:** IVY Comptech  
**Technology:** Angular, ASP .NET, Web API, C#, KonvaJS

- Worked on developing the product for the online sports betting industry.
- We created multiple labels for our clients using Angular as frontend and Web API to handle business logic. The underlying framework is ASP.NET.
- Used KonvaJS to create the 2D animation to visualize the live match stats for Basketball and Ice-hockey.

**Company:** Mirabel Technologies India Private Limited  
**Technology:** ASP .NET, Web API, C#, jQuery, SQL Server

- Worked on the development and enhancements of the Online pagination tool using ASP.Net and jQuery.
- Developed and managed Mirabel's magazine newsstand using ASP.Net MVC.

**Company:** Tata Consultancy Services  
**Technology:** ASP .NET, C#, jQuery, SQL Server

- Worked on the development of the product for the telecom domain using ASP .NET.
- Created automated tools using C# which helped the QA team to streamline the process by removing the manual efforts.
